

Az api megfelelően elindul:

```
INFO:      Unicorn running on http://127.0.0.1:9000 (Press CTRL+C to quit)
INFO:      Started reloader process [17588] using StatReload
INFO:      Started server process [7660]
INFO:      Waiting for application startup.
INFO:      Application startup complete.
INFO:      127.0.0.1:53052 - "GET /docs HTTP/1.1" 200 OK
INFO:      127.0.0.1:53052 - "GET /openapi.json HTTP/1.1" 200 OK
```

A user hozzáadás megfelelően működik a jó paraméterekkel:

Code	Details
201 <i>Undocumented</i>	Response body <pre>{ "id": 51, "name": "Name", "email": "namedguy@gmail.com" }</pre>

```
INFO:      127.0.0.1:53059 - "POST /adduser HTTP/1.1" 201 Created
```

Rossz paraméterek esetén ugyanez a függvény hibát dob:

```
INFO:      127.0.0.1:53070 - "POST /adduser HTTP/1.1" 422 Unprocessable Content
```

```
"detail": [
  {
    "type": "int_parsing",
    "loc": [
      "body",
      "id"
    ],
    "msg": "Input should be a valid integer, unable to parse string as an integer",
    "input": "5"
  },
  {
    "type": "string_type",
    "loc": [
      "body",
      "name"
    ],
    "msg": "Input should be a valid string",
    "input": "53"
  },
  {
    "type": "value_error",
    "loc": [
      "body",
      "email"
    ],
    "msg": "value is not a valid email address: An email address must have an @-sign.",
    "input": "not_an_email",
    "ctx": {
      "reason": "An email address must have an @-sign."
    }
  }
]
```

Hozzáadtam egy kosarat és terméket további teszteléshez:

```
INFO:      127.0.0.1:53077 - "POST /addshoppingbag?userid=51 HTTP/1.1" 201 Created
INFO:      127.0.0.1:53078 - "POST /additem?userid=51 HTTP/1.1" 201 Created
```

Sikerült módosítani a terméket:

200

Response body

```
{
  "id": 108,
  "user_id": 51,
  "items": [
    {
      "item_id": 5132,
      "name": "tészta",
      "brand": "fusilli",
      "price": 500,
      "quantity": 20
    }
  ]
}
```

Kitörölni is:

200

Response body

```
{
  "id": 108,
  "user_id": 51,
  "items": []
}
```

```
INFO: 127.0.0.1:53103 - "PUT /updateitem?userid=51&itemid=5132 HTTP/1.1" 200 OK
INFO: 127.0.0.1:53104 - "DELETE /deleteitem?userid=51&itemid=5132 HTTP/1.1" 200 OK
```

Ugyanez a függvény hibát dob, ha nem találja a terméket a kosárban:

Code Details

404

Undocumented

Error: Not Found

Response body

```
{
  "detail": "Item not found in basket"
}
```

vagy a usert:

404

Undocumented

Error: Not Found

Response body

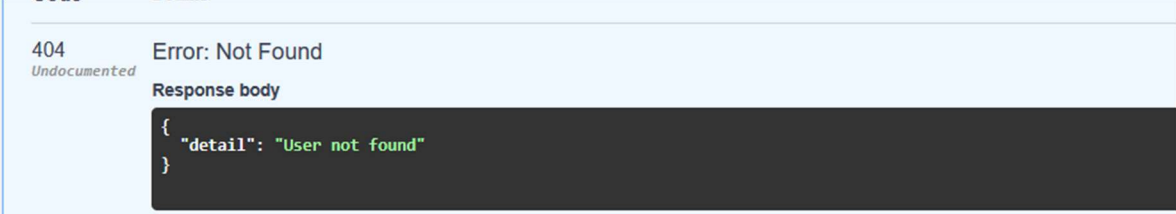

```
{
  "detail": "User not found"
}
```

```
INFO: 127.0.0.1:53107 - "DELETE /deleteitem?userid=51&itemid=5131 HTTP/1.1" 404 Not Found
INFO: 127.0.0.1:53113 - "DELETE /deleteitem?userid=50&itemid=5132 HTTP/1.1" 404 Not Found
```

A többi függvény is megfelelően működik a megfelelő paraméterekkel:

```
INFO: 127.0.0.1:53115 - "GET /users HTTP/1.1" 200 OK
INFO: 127.0.0.1:53116 - "GET /shoppingbag?userid=51 HTTP/1.1" 200 OK
INFO: 127.0.0.1:53117 - "GET /getusertotal?userid=51 HTTP/1.1" 200 OK
INFO: 127.0.0.1:53119 - "GET / HTTP/1.1" 200 OK
INFO: 127.0.0.1:53120 - "GET /user?userid=51 HTTP/1.1" 200 OK
```

Mindezek esetében, ha rossz usert kap meg, akkor ezt fogja dobni (ahol van paraméter persze):

```
404 Error: Not Found
Undocumented
Response body
{
  "detail": "User not found"
}
```

```
INFO: 127.0.0.1:53134 - "GET /user?userid=50 HTTP/1.1" 404 Not Found
INFO: 127.0.0.1:53135 - "GET /shoppingbag?userid=50 HTTP/1.1" 404 Not Found
INFO: 127.0.0.1:53136 - "GET /getusertotal?userid=50 HTTP/1.1" 404 Not Found
```

A program megfelelően leáll:

```
INFO: Shutting down
INFO: Waiting for application shutdown.
INFO: Application shutdown complete.
INFO: Finished server process [7660]
INFO: Stopping reloader process [17588]
```
